Re: Approval for Cleanup and Disposal of PCB Remediation Waste under 40 CFR §761.61(a) and Approval for Characterization and Verification Sampling under 40 CFR §761.61(c)

Dear Mr. Castagnola:

This is in response to the March 18, 2010 Notification of Self-Implementing Onsite Cleanup and Disposal of PCB Remediation Waste, submitted by the New York City School Construction Authority (SCA). The submission concerns SCA's plan to address polychlorinated biphenyl (PCB) contamination in the soil at Public School 71K (PS 71K), located at 215 Heyward Street in Brooklyn, New York. The proposed remediation plan was amended through submittal of additional information by SCA in an electronic message dated May 4, 2010. These documents will be referred to as the "Application". The PCB contaminated soil is considered to be PCB remediation waste that exceeds the cleanup levels under the federal PCB regulations at 40 CFR §761.61(a)(4).

With the exception of the characterization and verification sampling requirements under Subparts N and O of 40 CFR Part 761, the proposed removal of the PCB remediation waste meets the self-implementing cleanup and disposal requirements under 40 CFR §761.61(a). Based on characterization sampling of the soil conducted at PS 71K and the proposed removal and disposal off-site of soil, EPA finds that this sampling, in this proposed remediation context, is acceptable for delineating areas of PCB remediation waste to be addressed. EPA also finds that SCA's plan for verification sampling is acceptable for purposes of determining compliance with the PCB cleanup standards for high occupancy areas of 1 part per million (unrestricted) and 10 parts per million (with implementation of a cap and deed restriction meeting the requirements of 40 CFR §761.61(a)(7) and (a)(8), respectively).

EPA is approving SCA's Application, and it may proceed with the cleanup and disposal under 40 CFR §§761.61(a) and (c) and its Application, subject to this approval. This approval also constitutes an order under the authority of Section 6 of the Toxic Substances Control Act, 15 U.S.C. § 2605.

Please note that this approval does not constitute a determination by EPA that the transporters or disposal facilities selected by SCA are authorized to conduct the activities set forth in the Application. SCA is responsible for ensuring that its selected transporters and disposal facilities are authorized to conduct these activities in accordance with all applicable federal, state and local statutes and regulations.

Should you have any questions concerning this matter, please contact James S. Haklar, Ph.D., of my staff, at (732) 906-6817.

Sincerely yours,

Dore LaPosta, Director
Division of Enforcement and Compliance Assistance
